

Recovering 90%+ of Lost FBA Revenue for Leverify

Client: Leverify

The Challenge: Lost Revenue and Wasted Hours

Before partnering with Veritas Analytica, Leverify's team was spending "countless hours on manual FBA claims". This inefficient process resulted in "lost revenue" and, just as importantly, "pulled focus from core growth activities".

Their goals were clear:

- "Accelerate case filing and follow-up"
- "Maximize the recovery of lost funds"
- "Reallocate their team's time to higher-value tasks"

The Solution: Expert-Led, AI-Powered Recovery

Veritas Analytica implemented its fully managed, AI-driven reimbursement service. By deploying our proprietary technology and expert team, we took over the entire claims lifecycle.

The solution "expertly managed" the claims process, "using AI to accelerate case filing and follow-up", directly addressing Leverify's primary goals.

The Results: A New, Automated Revenue Stream

The outcomes provided a significant, measurable impact on Leverify's business:

90%+

Recovery Rate

We "recovered over 90% of their identified lost revenue"

100%

Process Automation

The "claims process is now expertly managed", removing the manual burden

∞

Refocused Team

Their "internal team was freed to work on critical tasks that drive business growth"

Customer Testimonial

"Veritas Analytica delivered a significant ROI by recovering funds we had written off. They transformed a complex operational headache into an automated revenue stream, which allows our team to focus entirely on growth."
